

## New by Multiplex: The ParkMaster 3D

*The Company that brought you Elapor Foam!*

With the ParkMaster 3D you can now fly aerobatics outdoors just like you do indoors! Designed by world renowned R/C pilot and German Indoor Aerobatics Champion, Martin Muller, the ParkMaster 3D is built from the ultra durable ELAPOR® foam making it tough enough for everyday flying. The ParkMaster 3D can also be flown outdoors in moderate wind, something you can't do with your typical indoor "foamy" models. When built out with the optional Servo (#M998231) and Power Pack (#M993231), the ParkMaster 3D will have all the power and control needed to fly the most difficult 3D maneuvers.

- Pre-fabricated molded ELAPOR® foam parts
- Fully 3D capable
- Ultra-low wing loading
- Ideal for sharpening aerobatic skills
- Most durable plane of its class
- It's AcroMaster meets ShockFlyer®

Case Quantity = 4

### Specifications

Wingspan	38 in.
Length	39 in.
All Up Weight	20 oz.
Part	#M214231
Street Price	\$132.00

### Recommended Flight Gear

Item	Street Price
Power Pack #M993231 Includes: Himax 2816-0890 Brushless Motor, BL-17 ESC, 11 x 5.5 Prop with hub	\$128.00
Servo Pack: #M998231 (4) HS-65HB plus extensions	\$123.00
Battery: 3S 900 - 1300 mAh LiPo
